

PRE & POST CARE

PRODUCT GUIDE

Quick reference for trained practitioners using SugarBrig professional care products

Use this guide as a simple product-flow reminder. Product choice may vary by practitioner preference and treatment area.

PDI / Cleanser → Powder → Toner / Witch Hazel → Lotion

1 **PDI / CLEANSER | BEFORE SERVICE**

Purpose: Clean the treatment area before hair removal.

Choose either option based on practitioner preference. PDI is a convenient disposable wipe. Cleanser is a cleansing liquid applied to a clean cloth for the client to cleanse the area.

2 **POWDER - 8 OZ / 16 OZ | DURING SERVICE**

Purpose: Help keep the treatment area dry and oil-free for easier hair removal.

Both sizes serve the same purpose. Choose the size that best suits your treatment-room needs.

3 **TONER / WITCH HAZEL | AFTER SERVICE - FACE**

Purpose: Remove the sticky feeling, clean the treated area and help reduce the appearance of redness after facial hair removal.

Toner is a gentle finishing option that refreshes and soothes freshly treated skin. Witch Hazel offers a more astringent-feeling finish and leaves the skin feeling clean and refreshed. Both may be used on larger body areas, but using them over the full body can become costly. Lotion is the more practical aftercare choice for larger treated areas.

4 **LOTION | AFTER SERVICE - BODY**

Purpose: Help calm freshly treated skin, keep it moisturized and leave the client feeling refreshed after hair removal.

Available options: 16 oz Unscented Lotion, or 8 oz Lotion in Unscented and scented options. For larger body areas, lotion is an economical and comfortable finishing choice.

Professional Quick Reference

For trained practitioners. Follow the service method and product guidance provided during your training.
